Associate Consultant at Oracle Financial Services Software (OFSS) with experience developing and supporting enterprise banking applications using Java, Spring Boot, PL/SQL, Oracle Database, and Oracle FLEXCUBE. Skilled in REST APIs, production support, SQL optimization, and implementing backend enhancements for global banking clients across the Middle East, Europe, and Asia.

EDUCATION

- Bachelor of Engineering in Computer Science**

Thakur College of Engineering and Technology, Mumbai (CGPA: 9.15/10)

July 2020 – May 2024

PROFESSIONAL EXPERIENCE

- Oracle Financial Services Software (OFSS)**

Mumbai, India

Associate Consultant

Oct 2024 – Present

- Contributed to Oracle FLEXCUBE **Core Banking, Payments, and SWIFT** modules working on enterprise banking applications.
- Enhanced **PL/SQL packages, procedures, functions, and triggers** to implement business requirements and functional enhancements.
- Resolved 50+ production and UAT issues**, including 10+ critical incidents, through SQL/PLSQL debugging, root cause analysis, and solution implementation.
- Developed and maintained **Java and Spring Boot** backend services integrated with Oracle Database while implementing business enhancements and production fixes.
- Participated in deployment, upgrade, and release activities while collaborating with functional consultants and QA teams to ensure application stability.

PROJECTS

Mays Computers Management Website | Spring Boot, React.js, MySQL, Redis, Nginx

| GitHub

Business Management and Inventory Platform

Mar 2026 – Present

- Developed a full-stack inventory and service management platform using **Spring Boot, React.js, MySQL, and Hibernate/JPA** for managing customers, devices, inventory, tickets, and billing.
- Designed and implemented **30+ RESTful APIs** following REST principles for authentication, inventory, customer, device, and service management modules.
- Implemented secure authentication and authorization using **Spring Security, JWT, and Role-Based Access Control (RBAC)** to protect application endpoints.
- Integrated **Redis** for caching frequently accessed data, reducing database queries and improving API response times.
- Configured **Nginx** as a reverse proxy to serve the React frontend and route API requests to the Spring Boot backend.
- Designed normalized relational database schemas and optimized data access using **Spring Data JPA**, Hibernate, and custom DTO projections.
- Built and managed the project using **Maven**, integrating dependency management and streamlined application builds.
- Used **Git** and GitHub for version control, collaborative development, and feature-based branching workflows.

TECHNICAL SKILLS

Programming Languages: Java, PL/SQL, SQL, JavaScript

Backend Technologies: Spring Boot, Spring MVC, REST APIs, Hibernate/JPA

Databases: Oracle Database, MySQL, Redis, MongoDB

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Developer Tools: Maven, Git, GitHub, Docker, Linux, Postman, GitHub Actions

Core Java: OOP, Collections, Exception Handling, Multithreading, Data Structures Algorithms

Banking Domain: Oracle FLEXCUBE, SWIFT Payments, Core Banking, Enterprise Applications
